XUnit will be displayed in [] of front panel.

DIN W72×H36mm, W96×H48mm, W72×H72mm Digital panel meter for measuring voltage

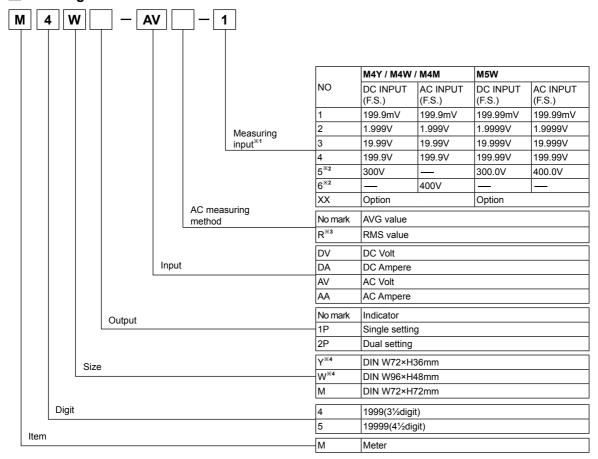

Features

- Max. display: 19999(M5W), 1999(Others)
- Auto zero function or Hold function(Except for M5W)
- RMS/AVG value selection function(AC Voltage)
- 7 Segment LED Display
- · Case size by DIN specification
- Indicator, Single preset output type,
 Dual preset output type

Please read "Caution for your safety" in operation manual before using.

Ordering information

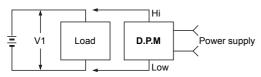

- X1: Measuring input and display are 1:1.
- ※2: Available input can be direct connection if under 300VDC, 400VAC.
- X3: M5W AC measurement type has RMS only. It does not have "R" in model name.
- X4: M4Y, M5W are indicator.

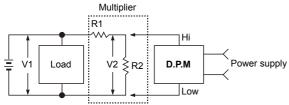

L-52 Autonics

■ The application of connections

Measuring DC voltage

(Fig. 1) Measuring lower than 300VDC of measurement voltage (V1)

(Fig. 2) Measuring higher than 300VDC of measurement voltage

When measuring voltage is higher than 300VDC, please select R1 and R2 with multiplying resistance on the external to make V2 less than max. measurement voltage.

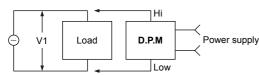

$$V3 = \frac{R2}{R1 + R2} \times V1$$
 R1 > R2

Ex)Ordering D.P.M for measuring 1000VDC

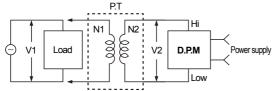

As above Fig. 2, select the R1 value to make 300VDC on R2.

(Generally R1 value will be higher than R2 value.) Order the D.P.M indicating 1000V for 300VDC.

Measuring AC voltage

(Fig. 3) Measuring lower than 400VAC of measurement voltage (V1)

(Fig. 4) Measuring higher than 400VAC of measurement voltage (V1)

When measuring voltage is higher than 400VAC, please use the P.T on the external. (V2 voltage must be lower than max. measurement voltage)

$$V2 = \frac{N2}{N1} \times V1$$

Ex)Ordering D.P.M for measuring 1000VAC

Select the P.T having 1000VAC of 1st part voltage and 220VAC of 2nd part voltage and order the D.P.M indicating 1000V for 220VAC.

Proper usage

- Please notice the product customized by requirement cannot be replaced.
- If it displays arbitrary number even though the power is ON, please remove the input signal and check whether it displays "DDD" after short the measurement terminal. (Checking auto zero function)

If it does not display "@@@", please connect to our A/S center

Note)M5W Series does not have auto zero function.

 If it indicates "1999" or "1999" during input signal is ON, please turn OFF the power and check the connection condition.

It is because the input signal is too low or high. Note) M5W Series indicates " 19999" or "19999".

- The specification of measurement input, which is indicated in ordering information, is a standard specification, 1:1 of measurement input and process value. When it is an optional specification of AC voltmeter, please mark the specification of P.T after select a model.
 XPlease notice P.T is not included.
- The D.P.M for measuring AC voltage has both AVG type and RMS type separately. Because it is produced with AVG type, please mark the model name accurately.

Ex)In case of M4Y, M4W, M4M Series (Include setting type)

The model of RMS type: M4W-AVR-6 The model of AVG type: M4W-AV-6

XThe specification will be set by sign "R".

 In case of D.P.M for measuring AC voltage, please check if it is AVG type or RMS type when comparison measuring with other company's products. (A) Photo electric sensor

						5	19999(4½di	ait)		

X1: Measuring input and display is 1:1 for DC INPUT No.1 to 5 and AC INPUT No.1 to 3, DC INPUT No.6 to 8 is used with DC50mV Shunt, AC INPUT No.4 to 6 are used with C.T(Current transformer)

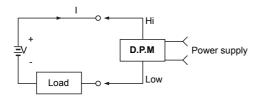

※3: M4Y, M5W are indicator.

L-54 Autonics

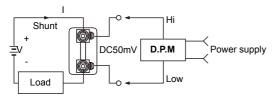

X2: M5W AC measurement type has RMS only. It does not have "R" in model name.

Connections

O Measuring DC ampere

(Fig. 1) Measuring lower than DC2A of current

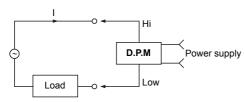

(Fig. 2) Measuring higher than DC2A of current

**Higher than DC2A is using shunt for measuring current. Basically the 2nd part of shunt value is DC50mV.

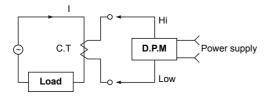

Ex) Ordering D.P.M in case of DC10A of measuring ampere: Select DC10A/50mVDC of shunt and 50mVDC/DC10.00A of D.P.M.

Measuring AC ampere

(Fig. 3) Measuring lower than AC5A of current

Ex) Ordering D.P.M in case of lower than AC5A of measuring ampere: Select M4W-AA-XX AC5A/5.00A

(Fig. 4) Measuring higher than AC5A of current

XIf the current is higher than AC5A, please use C.T.

Ex) How to order D.P.M in case of AC300A of measuring ampere: Select AC300A/5A of C.T and AC5A/300A of D.P.M.

Proper usage

 Please notice the product customized by requirement cannot be replaced.

 If it displays arbitrary number even though the power is ON, please remove the input signal and check whether it displays """ after short the measurement terminal. (Checking auto Zero function)

If it does not display "0 0 0", please connect to our A/S center

Note) M5W Series does not have auto zero function.

 If it indicates "1999" or "1999" during input signal is ON, please turn OFF the power and check the connection condition.

It is because the input signal is too low or high.

Note) M5W Series indicates " 19999" or "+99999".

 The specification of measurement input, which is indicated in ordering information, is a standard specification, 1:1 of measurement input and process value.

XPlease notice a shunt and C.T are not included.

 The D.P.M for measuring AC ampere has both AVG type and RMS type separately.

Because it is produced with AVG type, please mark the model name accurately.

Ex) In case of M4Y, M4W, M4M Series(Include setting type)

The model of RMS type: M4W-AAR-5 The model of AVG type: M4W-AA-5

XThe specification will be set by sign "R".

 In case of D.P.M for measuring AC ampere, please check if it is AVG type or RMS type when comparison measuring with other company's products. (A) Photo electric sensor

DIN W72×H36mm, W96×H48mm, W72×H72mm Digital panel meter for measuring power

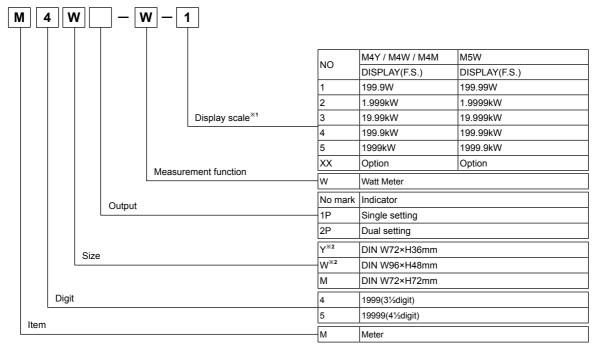

Features

- Max. display: 19999(M5W), 1999(Others)
- Auto zero function and hold function(Except for M5W)
- Display the output(0-10VDC) from power converter. (It is available to correspond when output is DC4-20mA, 1-5VDC.)
- 7 Segment LED display
- Case size by DIN specification.
- Indicator, single preset output type, Dual preset output type

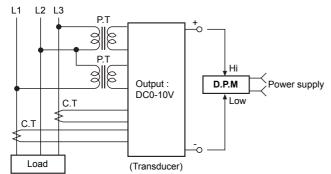

Ordering information

- X1: When output specification of power converter is 0-10VDC, display value is maximum.
- X2: M4Y, M5W are indicator.
- XIf output specification of Converter or power converter is DC4-20mA or 1-5VDC, please use scaling meter.

Application of connection

- The specification of measuring input indicated in ordering information, is display value output specification is 0-10VDC.
- When the output of transducer or converter is DC4-20mA or 1-5VDC, please use scaling meter.

L-56 Autonics

- Auto zero function or hold function(Except for M5W)
- RMS/AVG value selection function(AC voltage)
- 7 Segment LED display
- · Case size by DIN specification
- Indicator, single preset output type, Dual preset output type

1234 - Trades

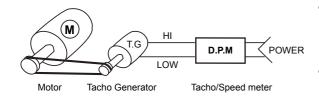

Ordering information

%1: AC measuring type of M5W only applies to RMS and it is not marked with "R" in the model name.

%2: M4Y. M5W are indicator.

Application of connection

• Tacho Generator(T.G)

This generator makes a voltage in proportion to revolution speed of motor. The D.P.M receives the voltage and displays the number of revolution and please check the specification of T.G.

 The specification of measuring input indicated in ordering information, is display value when output specification is 0-10VDC and 0-10VAC. Different output specification of tacho generator is optional. (A) Photo electric sensor
