DATEXEL

'P.D.S. SERIES": temperature and signal transmitters and converters for DIN rail mounting

The P.D.S. (programmable by dip-switches) series transmitters and converters can accept on their input signals coming from 2 or 3 wires Pt100. Thermocouple and Strain Gauge sensors or Voltage and Current signals.

- Single and double channel 4÷20 mA two wires transmitters for Pt100 input without galvanic isolation (DAT2065, DAT2066)
- 4÷20 mÅ two wires transmitter for Thermocouple input without galvanic isolation (DAT2045)
- Single and double channel converters for Pt100 input with configurable output as voltage or current without galvanic isolation (DAT2165, DAT2166)
- Isolated converter for Pt100 input with configurable output as voltage or current (DAT2061)
- Converter for Thermocouple input with configurable output as voltage or current without galvanic isolation (**DAT2145**)
- Isolated signal converters with configurable input and output as voltage or current (DAT5020. DAT5021, DAT5023I, DAT5023V)
- Isolated signal splitter with configurable input and output as voltage or current (**DAT5022**)
- Isolated signal converter for Strain Gauge input with configurable output as voltage or current (**DAT5025**)

DAT 2066

GENERAL DESCRIPTION

The transmitter DAT 2065 is designed to provide on its output a linearised 4÷20 mA current loop signal proportional with the temperature characteristic of the Pt100 sensor connected on its input.

It is possible to connect on the input both 3 wires and 2 wires Pt100.

FEATURES

- Configurable Input for Pt100
- Good accuracy and performance stability
- Configurable by DIP-switches
- 4 to 20 mA linearised output on current loop
- Unit of measure configurable in °C or °F
- EMC compliant CE mark
- DIN rail mounting in compliance with EN-50022 and EN-50035

about 300 ms

DAT 2061

GENERAL DESCRIPTION

The converter DAT 2061 is designed to provide on its output a linearised voltage or current signal proportional with the temperature characteristic of the Pt100 sensor connected on its input.

It is possible to connect on the input both 3 wires and 2 wires Pt100.

FEATURES

- Input for RTD type Pt100
- Unit of measure configurable in °C or °F
- Zero and Span values configurable by DIP-switches
- Voltage or current output
- Output values configurable by DIP-switches
- Galvanic isolation at 2000 Vac between input / output and power supply

NOT LINEARIZED DIP SWITCH CONFIGURABLE TRANSMITTER FOR THERMOCOUPLE

GENERAL DESCRIPTION

Full Scale

The transmitter DAT 2045 is designed to provide on its output a $4 \div 20$ mA current loop signal linear and proportional with the value of voltage generated from the thermocouple connected to its input.

The DAT 2045 doesn't execute the linearisation of the input signal; this feature allows to use the transmitter with acquisition systems with an internal linearisation software.

- Configurable Input for thermocouples type K, J, R, S and T
- Good accuracy and performance stability
- Configurable by DIP-switches
- 4 to 20 mA "voltage linear" output on current loop
- Unit of measure configurable in °C or °F
- EMC compliant CE mark
- DIN rail mounting in compliance with EN-50022 and EN-50035

DIP SWITCH CONFIGURABLE 3 WAYS ISOLATED SIGNAL CONVERTER

x 12.5

GENERAL DESCRIPTION

Thermal drift (1)

Full Scale

The converter DAT 5020 is designed to provide on its output a voltage or current signal proportional with the value of the normalised signal or the potentiometer applied on its input. The user can program the input and output ranges by the proper DIP-switches available after opening the suitable door located on the side of device. The regulation of Zero and Span values is made by the ZERO and SPAN potentiometers located on the top of device. The 2000 Vac isolation between input, power supply and output eliminates the effects of all ground loops eventually existing and allows the use of the converter in heavy environmental conditions found in industrial applications. On the input side, an auxiliary supply source isolated from the power supply is provided; this allows to connect on input both active and passive current loops.

FEATURES

- Input for voltage, current and potentiometer signal
- Voltage or current configurable output
- High number of Input / output configuration
- Galvanic isolation at 2000 Vac on the 3 ways
- Isolated power supply source for passive current transmitter on input
- Good accuracy and performance stability
- EMC compliant CE mark
- DIN rail mounting in compliance with EN-50022 and EN-50035

DIP SWITCH CONFIGURABLE CONVERTER FOR AC CURRENT SIGNAL

DAT 5023lac

The converter DAT 5023Iac is designed to detect the TRMS value of the AC current signal from 0÷5 A to 0÷60 A applied on its input providing a voltage or current output signal. The user can program the input and output ranges by the proper DIP-switches available after opening the suitable door located on the side of device. The regulation of Zero and Span values is made by the ZERO and SPAN potentiometers located on the top of device. The 2000 Vac isolation between power supply and output eliminates the effects of all ground loops eventually existing and allows the use of the converter in heavy environmental conditions found in Industrial applications.

The measure of the input signal is executed by a cross connector and a Hall effect transducer, this allows to isolate the input side from the output and power supply.

FEATURES

- Input for AC current signal
- Build-in cross connector (8mm diameter)
- Measure by Hall effect transducer
- True Root Mean Square (TRMS) measure
- Galvanic isolation at 2000 Vac

- Isolated power supply source for passive loads on output
- Independent zero and full scale regulations
- EMC compliant CE mark

Current output

- DIN rail mounting in compliance with EN-50022 and EN-50035

ISOLATED CONVERTER FOR DC CURRENT SIGNAL WITH FIXED INPUT AND DIP SWITCH CONFIGURABLE OUTPUT

DAT 50231

The converter DAT 5023Idc is designed to convert the DC current signal from $0 \div 5$ A to $0 \div 60$ A applied on its input in a voltage or current output signal. The device is available in three versions (A, B and D) in function of the input current value.

The user can program the output ranges by the proper DIP-switches available after opening the suitable door located on the side of device

The regulation of Zero and Span values is made by the ZERO and SPAN potentiometers located on the top of device.

FEATURES

- Input for DC current signal
- Build-in cross connector (8mm diameter)
- Measure by Hall effect transducer
- Isolated power supply source for passive loads on output
- Independent zero and full scale regulations
- EMC compliant CE mark
- DIN rail mounting in compliance with EN-50022 and EN-50035

DAT 5023/V

The converter DAT 5023/V is designed to detect the TRMS value of the AC voltage signal or to convert the DC voltage signal applied on its input in a voltage or current output signal. The user can program the input type and output ranges by the proper DIP-switches available after opening the suitable door located on the side of device.

The regulation of Zero and Span values is made by the ZERO and SPAN potentiometers located on the top of device.

The 1500 Vac isolation between input, power supply and output eliminates the effects of all ground loops eventually existing and allows the use of the converter in heavy environmental conditions found in industrial applications.

- Input for AC/DC voltage signal
- Dedicated measure inputs
- Input type of measure (AC / DC) configurable by DIP-switches
- True Root Mean Square (TRMS) measure
- Isolated power supply source for passive loads on output
- Voltage or current output configurable by DIP-switches
- Galvanic isolation at 1500 Vac between input, power supply and output
- Good accuracy and performance stability

ISOLATED PROGRAMMABLE DIP SWITCH CONVERTER FOR STRAIN GAUGE / BRIDGE SENSORS

DAT 5025

GENERAL DESCRIPTION

The converter DAT 5025 is designed to provide on its output a voltage or current signal linear and proportional with the output voltage coming from the output of a bridge transducer applied on its input.

The user can program the bridge excitation voltage value, the input and the output ranges by the proper DIP-switches available after opening the suitable door located on the side of device.

The regulation of Zero and Span values is made by the ZERO and SPAN potentiometers located on the top of device.

FEATURES

- Input for Strain-Gauge
- Input range configurable from 0÷10 mV up to 0÷200
- mV or from $\pm 5 \, mV$ up to $\pm 200 \, mV$
- Current limiter on the input side
- Galvanic isolation at 2000 Vac on the 3 ways
- Isolated power supply source for passive loads on output
- Independent zero and full scale regulations
- EMC compliant CE mark
- Din rail mounting in compliance with EN-50022
- and FN-50035

Application areas

POWER SUPPLY

Power supply voltage	18 30 Vdc
Rever. polarity protection	60 Vdc max
Aux. Power Supply OUT	12 Vdc min @ 20 mA

CURRENT CONSUMPTION

Current output with active Power supply aux operative (20 mA): 120 mA max.		
Voltage output	80 mA max.	

ISOLATION
